

Learning Disability Statistics Scotland, 2017

Published: 5th December 2017

A National Statistics Publication for Scotland

Annex B: Local Authority Level Learning Disability Statistics Scotland (2017)

This Annex provides information about adults with learning disabilities known to local authorities, at local authority level.

Any comparisons between the data provided by local authorities should take account of local populations, priorities and geographical circumstances, as well as data quality issues, for example non-response error, which have been flagged where appropriate. In particular, data users should be mindful of missing data across the individual data items. The statistical producer team is working closely in partnership with local authorities to progressively improve the data recorded, collected and published about adults with learning disabilities. Users should note the implementation of a change in the collection methodology in 2017 which results in a lack of comparability to previous years' data. More information can be found in the main release and accompanying annexes.

Local Authority Tables:

- Table B1a-c: Adults with learning disabilities known to local authorities (2017)
- Table B2: Adults who are on the autism spectrum (AS) by local authority area (2017)
- Table B3: Adults with learning disabilities who live with a family carer by local authority area (2017)
- Table B4: Adults with learning disabilities living in the same accommodation by local authority area (2017)
- Table B5: Accommodation type for adults with learning disabilities by local authority area (2017)
- Table B6: Local Area Co-ordination (LAC) availability and use by local authority area (2017)
- Table B7: Adults with learning disabilities who have Personal Life Plans (PLP) by local authority area (2017)
- Table B8: Adults with learning disabilities who use an advocacy service by local authority area (individual level data) (2017)
- Table B9: Adults with learning disabilities who use an advocacy service by local authority area (2017)
- Table B10: Employment opportunities for adults with learning disabilities known to local authorities (2017)
- Table B11: Category of employment opportunity for adults with learning disabilities known to local authorities (2017)
- Table B12a: Day centre attendance of adults with learning disabilities known to local authorities (2017)
- Table B12b: Alternative opportunities use by adults with learning disabilities known to local authorities (2017)
- Table B13: Further education attendance by adults with learning disabilities known to local authorities (2017)

Tables B1a-c: Adults with learning disabilities known to local authorities in 2017

These figures include adults with learning disabilities who are known to local authorities from contact in the last year. The figures include 16 and 17 year olds who are not in full-time education. Learning Disability Statistics Scotland changed collection methodology in the current collection to align with that of other national social care datasets. The data reported in this release relate to a single year reporting period from April 2016 to March 2017, compared to the three year reporting period used in previous collections.

This data does not include adults with learning disabilities who are not known to local authority areas. Please see the data quality summary in Annex C, published alongside this Statistical Return on December 5th 2017 for further information.

Glasgow City Council reported the highest number of adults with learning disabilities known (2,190 adults - please see Note 1 below), followed by City of Edinburgh Council (2,121 adults). Orkney Islands Council, an island council, reported the lowest number of adults with learning disabilities known (79 adults).

There are 5.2 adults with learning disabilities known to local authorities per 1,000 of the population in Scotland. At local authority level, this ranges from 3.5 adults with learning disabilities per 1,000 of the population in Perth and Kinross to 9.2 adults with learning disabilities per 1,000 of the population in Dundee City.

Notes

1. Glasgow City Council and North Lanarkshire Council only returned information on adults with learning disabilities who are in receipt of a service funded by the local authority, rather than those who are known to the local authority, as this is the information which can be extracted from their Management Information Systems. Data users should be aware that the number of adults with learning disabilities in these local authorities and the total number recorded nationally are therefore likely to be an under-

estimate. Of the remaining, 29 local authorities returned data as stipulated in the 2017 Data Guidance document.

2. There are 944 adults (3.5%) included in the Statistical Return who are on the autism spectrum and do not have an associated learning disability.
3. SCLD takes all possible steps to avoid duplicate records appearing in the Statistical Return, including data cleansing and checking processes. However, duplication of records for individuals is possible when a person is funded by one local authority but lives and/or receives services in another. Data guidance states that the local authority which provides the majority of funding for an individual should return data on that individual. Where it is unclear which local authority provides the majority of funding, local authorities work together during data collection to minimise duplication of records. It is possible that there may be duplicate records within the statistical return but SCLD statistical producer team estimates that this will be a very small proportion of the total, given that numbers of adults with learning disabilities living in a local authority different to that which funds a service for them are low.
4. Age in 2017 is calculated from date of birth.
5. There are 6 adults whose year of birth has not been recorded. They have been included in the totals column for number of adults known to local authorities.
6. These figures are likely to be an under-estimate of the true number of 16 and 17 year olds with learning disabilities, as they do not include 16 and 17 year olds who are in full-time education.

Table B1a: Adults with learning disabilities known to local authorities, by local authority area in 2017

Local authority	Total	Adults known per 1,000 population
Aberdeen City	1,044	5.3
Aberdeenshire	982	4.6
Angus	518	5.3

Scotland	188	1,123	4,821	1,951	2,324	1,976	1,308	0	13,691

One person recorded as 'gender unknown'. Their data is not included in this table to prevent disclosure of identifying information.

Values less than 5 have been disclosure controlled. This means any value under 5 is rounded to either 0 or 5 and another value in the same row has been rounded to the nearest 5 to prevent differencing (calculating a suppressed value by subtracting it from the total).

Published zeroes may or may not be true zeroes.

Table B1c: Women with learning disabilities known to local authorities, by local authority area in 2017

Local authority	Females								Total
	16-17	18-20	21-34	35-44	45-54	55-64	65 and over	Not known	
Aberdeen City	0	20	109	52	78	87	74	0	420

West Lothian	0	20	104	60	50	40	43	0	315
Scotland	75	518	2,780	1,432	1,795	1,596	1,290	0	9,486

Values less than 5 have been disclosure controlled. This means any value under 5 is rounded to either 0 or 5 and another value in the same row has been rounded to the nearest 5 to prevent differencing (calculating a suppressed value by subtracting it from the total). Published zeroes may or may not be true zeroes.

Table B2: Adults who are on the autism spectrum (AS) by local authority area in 2017

These figures show adults with learning disabilities and/or on the autism spectrum known to local authorities in Scotland. The data include people 16 and 17 years old and not in full time education. Learning Disability Statistics Scotland changed collection methodology in the current collection to align with that of other national social care datasets. The data reported in this release relate to a single year reporting period from April 2016 to March 2017, compared to the three year reporting period used in previous collections.

Some adults who are on the autism spectrum also have learning disabilities.

Some adults who are on the autism spectrum do not have learning disabilities. These figures are likely to represent a significant underestimate of the total number of adults on the autism spectrum in Scotland. This is due to a number of factors:

- Only adults known to local authorities who have received a formal medical diagnosis of being on the autism spectrum are included within this Statistical Return;
- Some adults on the autism spectrum will not have, or will not wish to have, any formal support;
- Some adults on the autism spectrum will access support through the NHS or other organisations, and therefore may not be known to local authorities;
- Local authorities may not be aware that an adult is on the autism spectrum;
- Local authority recording of whether an adult is on the autism spectrum can be patchy;
- Services such as local area co-ordination may work with adults on the autism spectrum when no other department of the local authority does so. This may lead to sample bias in some local authority areas.

However, these figures do provide further information about adults on the autism spectrum who are known to local authority learning disability services.

All local authorities returned data on adults with an autism spectrum diagnosis. Thirteen local authorities returned information on all individuals known to them on this data item.

4,755 adults known to local authorities in Scotland are recorded as being on the autism spectrum. This is 20.5% of all adults known to local authorities in Scotland.

Renfrewshire Council reported the highest number of adults with an autism spectrum diagnosis (554 adults) but also have the largest number of adults known to them. East Dunbartonshire Council reported the largest proportion of adults with an autism diagnosis as a proportion of all adults with learning disabilities known to them (30.8%).

Notes:

1. 32 local authorities returned data as stipulated in the 2017 Data Guidance document.
2. Information on this data item was not recorded for 3,901 adults with learning disabilities (16.8% of all adults known to local authorities). Missing data has not been imputed. Data users should be aware that the number of adults on the autism spectrum and those who do not have a diagnosis, are therefore likely to be higher than reported.
3. Highland Council recorded all adults with an autism spectrum diagnosis known in the area as having an 'other autism spectrum diagnosis' which may reflect a processing, measurement or coding error or may relate to the way in which the local Management Information System captures the data.

Local authority	Autism Spectrum diagnosis				No AS Diagnosis	Not known	AS diagnosis as % of all adults	All adults
	Classical Autism	Asperger's Syndrome	Other AS diagnosis	Total with AS diagnosis				
Aberdeen City	126	40	0	165	879	0	15.8	1,044
Aberdeenshire	88	8	17	113	869	0	11.5	982
Angus	71	16	27	114	394	10	22.0	518
Argyll & Bute	34	15	16	65	238	8	20.9	311
Clackmannanshire	0	0	68	68	253	0	21.2	321
Dumfries & Galloway	37	15	12	64	492	362	7.0	918

South Ayrshire	46	37	10	93	509	0	15.4	602
South Lanarkshire	124	38	9	171	827	0	17.1	998
Stirling	30	33	0	63	255	0	19.8	318
West Dunbartonshire	61	39	9	109	421	0	20.6	530
West Lothian	0	52	107	159	15	549	22.0	723
Scotland	1,977	659	2,119	4,755	14,530	3,901	20.5	23,186

Values less than 5 have been disclosure controlled. This means any value under 5 is rounded to either 0 or 5 and another value in the same row has been rounded to the nearest 5 to prevent differencing (calculating a suppressed value by subtracting it from the total). Published zeroes may or may not be true zeroes.

Table B3: Adults with learning disabilities who live with a family carer by local authority area in 2017

These figures include adults with learning disabilities who are known to local authorities from contact in the last 3 years. The figures include 16 and 17 year olds who are not in full-time education. Learning Disability Statistics Scotland changed collection methodology in the current collection to align with that of other national social care datasets. The data reported in this release relate to a single year reporting period from April 2016 to March 2017, compared to the three year reporting period used in previous collections.

In total, information on this item was not recorded for 5,976 adults with learning disabilities across Scotland. Missing data has not been imputed. Data users should be aware that both the number of adults with learning disabilities who live with a family carer and those who do not live with a family carer is therefore likely to be higher than the figure reported.

Just under a third (31.4%) of adults with learning disabilities known to local authorities were reported as living with a family carer.

West Dunbartonshire Council reported the highest proportion of adults with learning disabilities living with a family carer, at 56.2%.

Notes:

1. Aberdeenshire Council, Clackmannanshire Council and North Lanarkshire Council did not return any data for this item. Of the remaining, 29 local authorities returned data as stipulated in the 2017 Data Guidance document.

Local authority	Adults who live with a family carer	Adults who do not live with a family carer	Not known	Lives with family carer as % of all adults	All adults
Aberdeen City	227	648	169	21.7	1,044

West Lothian	321	233	169	44.4	723
Scotland	7,271	9,939	5,976	31.4	23,186

Values less than 5 have been disclosure controlled. This means any value under 5 is rounded to either 0 or 5 and another value in the same row has been rounded to the nearest 5 to prevent differencing (calculating a suppressed value by subtracting it from the total). Published zeroes may or may not be true zeroes.

Table B4: Adults with learning disabilities living in the same accommodation by local authority area in 2017

These figures include adults with learning disabilities who are known to local authorities from contact in the last 3 years. The figures include 16 and 17 year olds who are not in full-time education. Learning Disability Statistics Scotland changed collection methodology in the current collection to align with that of other national social care datasets. The data reported in this release relate to a single year reporting period from April 2016 to March 2017, compared to the three year reporting period used in previous collections.

Overall, there were 5,620 people for whom this data was not known by local authorities. Missing data has not been imputed. Data users should be aware that both the number of adults with learning disabilities living as the only person with learning disabilities in their accommodation and the number of adults living with other people with learning disabilities in the same accommodation may be higher, both at local authority level and at national level.

55.3% of adults with learning disabilities known to local authorities were the only person with learning disabilities in their accommodation. 20.5% of adults with learning disabilities known to local authorities live with **at least** one other person with learning disabilities.

Notes:

1. Aberdeenshire Council, Clackmannanshire Council and North Lanarkshire Council did not return any data for this item. Of the remaining, 29 local authorities returned data as stipulated in the 2017 Data Guidance document.

Values less than 5 have been disclosure controlled. This means any value under 5 is rounded to either 0 or 5 and another value in the same row has been rounded to the nearest 5 to prevent differencing (calculating a suppressed value by subtracting it from the total). Published zeroes may or may not be true zeroes.

Table B5: Accommodation type for adults with learning disabilities by local authority area in 2017

These figures include adults with learning disabilities who are known to local authorities from contact in the last 3 years. The figures include 16 and 17 year olds who are not in full-time education. Learning Disability Statistics Scotland changed collection methodology in the current collection to align with that of other national social care datasets. The data reported in this release relate to a single year reporting period from April 2016 to March 2017, compared to the three year reporting period used in previous collections.

Information on accommodation type was known for 20,998 adults with learning disabilities known to services (90.6% of all adults). However, no information was recorded on this data item for 2,188 (9.4%) adults with learning disabilities known to services. Missing data has not been imputed. Data users should be aware that the total number of adults living in mainstream accommodation, supported accommodation, registered adult care home and 'other' accommodation types is likely to be higher than recorded.

Aberdeenshire Council did not return information on just under two-thirds (58.9%) of adults with learning disabilities known to them for this item.

14,432 (62.2%) adults with learning disabilities known to local authorities were living in mainstream accommodation. 3,687 (19.9%) adults with learning disabilities known to local authorities were living in supported accommodation. 1,766 (7.6%) adults with learning disabilities known to local authorities were living in registered adult care homes.

Notes:

1. 32 local authorities returned data as stipulated in the 2017 Data Guidance document.

Local Authority	Mainstream accommodation:			Supported Accommodation	Registered Adult Care Homes	Other	Not known	All Adults
	with support	with no support	support status not recorded

Values less than 5 have been disclosure controlled. This means any value under 5 is rounded to either 0 or 5 and another value in the same row has been rounded to the nearest 5 to prevent differencing (calculating a suppressed value by subtracting it from the total). Published zeroes may or may not be true zeroes.

Table B6: Local Area Co-ordination (LAC) use by local authority area in 2017

These figures include adults with learning disabilities who are known to local authorities from contact in the last 3 years. The figures include 16 and 17 year olds who are not in full-time education.

Local area co-ordination services are not yet available to adults with learning disabilities throughout Scotland. Angus Council, Clackmannanshire Council, Dundee City Council, Falkirk Council, North Lanarkshire Council, Orkney Islands Council, Renfrewshire Council, Shetland Islands Council and South Ayrshire Council all report that they did not have a local area co-ordination services in 2017.

There were 3,408 adults (14.7% of **all adults**) using local area co-ordination services in 2017. This means that 20.5% of all adults living in local authorities where local area co-ordination services were available, used them.

Local authority	Uses LAC	Does not use LAC	Uses LAC as % of all adults	All Adults

West Lothian	56	667	7.7	723
Scotland	3,408	13,242	14.7	23,186

Values less than 5 have been disclosure controlled. This means any value under 5 is rounded to either 0 or 5 and another value in the same row has been rounded to the nearest 5 to prevent differencing (calculating a suppressed value by subtracting it from the total).

Published zeroes may or may not be true zeroes.

Table B7: Adults with learning disabilities who have Personal Life Plans (PLP) by local authority area in 2017

These figures include adults with learning disabilities who are known to local authorities from contact in the last 3 years. The figures include 16 and 17 year olds who are not in full-time education. Learning Disability Statistics Scotland changed collection methodology in the current collection to align with that of other national social care datasets. The data reported in this release relate to a single year reporting period from April 2016 to March 2017, compared to the three year reporting period used in previous collections.

This information is recorded for 19,063 (82.2%) adults with learning disabilities known to local authorities. However, information is not recorded for 4,123 (17.8%) adults with learning disabilities known to local authorities. Missing data has not been imputed. Data users should be aware that the totals across the data item are likely to be higher as a result.

Just over two-thirds (64.2%) of all adults with learning disabilities known to local authorities have a personal life plan. Around one in six (16.1%) adults with learning disabilities known to local authorities are reported not to have a personal life plan. There are 1.9% of all adults with learning disabilities for whom a personal life plan is not applicable; this is usually because the adult has not been asked whether or not they would like to have a personal life plan.

Notes:

1. 32 local authorities returned data as stipulated in the 2017 Data Guidance document.

Local authority	Has a PLP	Does not have a PLP	Has not been asked	Not known	Has PLP as % for all adults	All adults

Values less than 5 have been disclosure controlled. This means any value under 5 is rounded to either 0 or 5 and another value in the same row has been rounded to the nearest 5 to prevent differencing (calculating a suppressed value by subtracting it from the total). Published zeroes may or may not be true zeroes.

Table B8: Adults with learning disabilities who use an advocacy service by local authority area in 2017 (individual level data)

These figures include adults with learning disabilities who are known to local authorities from contact in the last 3 years. The figures include 16 and 17 year olds who are not in full-time education. Learning Disability Statistics Scotland changed collection methodology in the current collection to align with that of other national social care datasets. The data reported in this release relate to a single year reporting period from April 2016 to March 2017, compared to the three year reporting period used in previous collections.

Data users should be aware of the limitations of this data. Individual level data on advocacy have large amounts of missing data for a variety of reasons. First, it may not be appropriate or desirable for advocacy organisations to share data about individuals with learning disabilities with local authorities, especially if the individual requires some support with an issue relating to the local authority. Second, there may be difficulties with matching data provided by advocacy organisations. Third, local authorities and advocacy organisations may not have data sharing agreements in place. Fourth, a given adult's advocacy requirements or status may not be routinely collected by local authorities. Missing data has not been imputed.

There were 14 local authorities did not report on individual advocacy level data. Data on advocacy status were recorded for 8,604 (37.9%) adults with learning disabilities known to local authorities. Information on advocacy status was not recorded for 8,950 (38.6%) adults with learning disabilities known to local authorities.

Notes

1. City of Edinburgh Council, Orkney Islands Council, Renfrewshire Council, Shetland Islands Council and South Ayrshire Council did not return any data for this item, either aggregate or individual.
2. These data were collected on an individual level basis. This means a record was returned for each individual detailed in the statistics release.

3. 'Professional advocate', 'professional advocate: long term support' and 'professional advocate: short term support' are all grouped under the column 'professional advocate'.
4. * denotes local authority returned aggregated data only (see table B9).

Values less than 5 have been disclosure controlled. This means any value under 5 is rounded to either 0 or 5 and another value in the same row has been rounded to the nearest 5 to prevent differencing (calculating a suppressed value by subtracting it from the total). Published zeroes may or may not be true zeroes.

Table B9: Adults with learning disabilities who use an advocacy service by local authority area in 2017 (aggregated data)

These figures include adults with learning disabilities who are known to local authorities from contact in the last 3 years. The figures include 16 and 17 year olds who are not in full-time education. Learning Disability Statistics Scotland changed collection methodology in the current collection to align with that of other national social care datasets. The data reported in this release relate to a single year reporting period from April 2016 to March 2017, compared to the three year reporting period used in previous collections.

The data in Table B9 illustrate the aggregate number of adults with learning disabilities known to have advocacy support overall. Information is provided in this way as it may not be appropriate, desirable or possible for local authorities to provide individual level data for this item.

Only 8 of 32 local authority areas were able to supply aggregate data on advocacy. Data users should be aware that adults with learning disabilities in the other 24 local authority areas may also be in receipt of advocacy services.

Notes

1. City of Edinburgh Council, Orkney Islands Council, Renfrewshire Council, Shetland Islands Council and South Ayrshire Council did not return any data for this item, either aggregate or individual.
2. This information was returned by local authorities as aggregated data. This is because these local authorities could not provide data for each individual person detailed in the statistics release but could state how many people with a learning disability have advocacy support overall. There is potential for duplication of records in the aggregate data on advocacy, as one individual may seek support from more than one organisation and thus be counted multiple times.
3. Some figures have not been displayed (*) for individual local authorities to maintain confidentiality.
4. Figures in **bold black text** denote local authorities who returned aggregated data and no individual level data. Local authorities

who returned both individual level and aggregated data have been recorded with grey text.

Local Authority	2017	
	Total adults	Estimate of adults as % of all adults

Table B10: Employment opportunities for adults with learning disabilities known to local authorities in 2017

These figures include adults with learning disabilities who are known to local authorities from contact in the last 3 years. The figures include 16 and 17 year olds who are not in full-time education. Learning Disability Statistics Scotland changed collection methodology in the current collection to align with that of other national social care datasets. The data reported in this release relate to a single year reporting period from April 2016 to March 2017, compared to the three year reporting period used in previous collections.

Employment status is known for 14,085 (68.0%) adults with learning disabilities known to local authorities. Employment status is not recorded for 8,564 (32.0%) adults with learning disabilities known to services. Missing data has not been imputed. Data users should be aware that that the total numbers of adults with learning disabilities known to local authorities in employment and for adults not in employment are likely to be higher.

There were 1,219 (13.9%) adults with learning disabilities known to local authorities who were in employment. There were 12,866 (55.5%) adults with learning disabilities known local authorities who were not in employment.

Notes

1. 31 local authorities returned data as stipulated in the 2017 Data Guidance document. City of Edinburgh Council did not return any data for the 2017 employment variable.
2. Employment opportunities include the following: person in employment where open/non-open has not been specified; open employment; non-open employment; in training for employment (T.F.E.); and self-employment.

Local Authority	Not currently in employment	Under 16 hours per week	16 hours and over per week	In employment but hours not recorded	Total in Employment	Not known	Adults with employment opportunities as % of total adults	All Adults

West Dunbartonshire	513	13	4	0	17	0	3.2	530
West Lothian	714	2	7	0	9	0	1.2	723
Scotland	12,866	368	422	429	1,219	9,101	5.3	23,186

Values less than 5 have been disclosure controlled. This means any value under 5 is rounded to either 0 or 5 and another value in the same row has been rounded to the nearest 5 to prevent differencing (calculating a suppressed value by subtracting it from the total). Published zeroes may or may not be true zeroes.

Table B11: Category of employment opportunity for adults with learning disabilities known to local authorities in 2017

These figures include adults with learning disabilities who are known to local authorities from contact in the last 3 years. The figures include 16 and 17 year olds who are not in full-time education. Learning Disability Statistics Scotland changed collection methodology in the current collection to align with that of other national social care datasets. The data reported in this release relate to a single year reporting period from April 2016 to March 2017, compared to the three year reporting period used in previous collections.

Employment opportunity categories include the following: person in employment where open/non-open has not been specified; open employment; non-open employment; and self-employment. Please see the main report for an explanation of open/non-open employment. 31 local authority areas returned data on this item.

Employment opportunities type is known for 803 (3.5%) adults with learning disabilities known to local authorities. Employment type is known for 66.7% of adults with learning disabilities known to be in employment. Employment type is not recorded for 406 (1.8%) adults with learning disabilities known to services. Missing data has not been imputed.

Only one local authorities recorded more than 100 people with learning disabilities in employment or training for employment and therefore, the number of adults in different categories of employment are relatively small at local authority level. Data users should exercise caution when using this data to draw conclusions at local authority level.

There are 2.0% of adults with learning disabilities known to local authorities who were in open employment. As a proportion of adults in employment this figure is 38.6%.

Notes:

1. 31 local authorities returned data as stipulated in the 2017 Data Guidance document. City of Edinburgh Council did not return any data for the 2017 employment variable.

Local Authority	Open employment	Non-open employment	In employment, type not specified	Self employment	Total adults in employment	Not in employment	Not known	Total in employment as % of all adults	All adults

Values less than 5 have been disclosure controlled. This means any value under 5 is rounded to either 0 or 5 and another value in the same row has been rounded to the nearest 5 to prevent differencing (calculating a suppressed value by subtracting it from the total). Published zeroes may or may not be true zeroes.

Table B12a: Day centre attendance of adults with learning disabilities known to local authorities in 2017

These figures include adults with learning disabilities who are known to local authorities from contact in the last 3 years. The figures include 16 and 17 year olds who are not in full-time education. Learning Disability Statistics Scotland changed collection methodology in the current collection to align with that of other national social care datasets. The data reported in this release relate to a single year reporting period from April 2016 to March 2017, compared to the three year reporting period used in previous collections.

Day centre attendance is recorded for 18,612 (80.3%) adults with learning disabilities known to local authorities. Data is not recorded for 4,574 (19.7%) adults with learning disabilities known to local authorities. Missing data has not been imputed. Data users should be aware that totals both for adults attending and adults not attending a day centre are likely to be higher than reported.

Just under one fifth (19.0%) of adults with learning disabilities known to local authorities attended a day centre and 14,211 (61.3%) adults with learning disabilities known to local authorities did not attend a day centre in 2017.

Notes

1. North Lanarkshire Council did not report data for this item because there are no day centres operating in North Lanarkshire.

Local authority	Attends a day centre less than 30 hours per week	Attends a day centre 30 hours or more per week	Attends a day centre, amount of time not known	Does not attend a day centre	Not known	Adults who attend a day centre as % of all adults	All Adults

Table B12b: Alternative opportunities use by adults with learning disabilities known to local authorities in 2017

These figures include adults with learning disabilities who are known to local authorities from contact in the last 3 years. The figures include 16 and 17 year olds who are not in full-time education. Learning Disability Statistics Scotland changed collection methodology in the current collection to align with that of other national social care datasets. The data reported in this release relate to a single year reporting period from April 2016 to March 2017, compared to the three year reporting period used in previous collections.

Notes:

1. Aberdeenshire Council and Stirling Council did not return any data for this item.
2. A number of local authorities reported a decrease in the amount of known information for this item as a result of an increasing number of people commissioning alternative day opportunities themselves.

Local authority	Has alternative opportunities	Does not have alternative opportunities	Not known	Adults who have alternative opportunities as a % of all adults	All adults
Aberdeen City	403	436	205	38.6	1,044

Values less than 5 have been disclosure controlled. This means any value under 5 is rounded to either 0 or 5 and another value in the same row has been rounded to the nearest 5 to prevent differencing (calculating a suppressed value by subtracting it from the total). Published zeroes may or may not be true zeroes.

Table B13: Further education course enrolment of adults with learning disabilities known to local authorities in 2017

These figures include adults with learning disabilities who are known to local authorities from contact in the last 3 years. The figures include 16 and 17 year olds who are not in full-time education. Learning Disability Statistics Scotland changed collection methodology in the current collection to align with that of other national social care datasets. The data reported in this release relate to a single year reporting period from April 2016 to March 2017, compared to the three year reporting period used in previous collections.

The further education status of 12,675 (54.6%) adults with learning disabilities known to local authorities is recorded. The further education status of 10,511 (45.3%) adults with learning disabilities is not recorded. Missing data have not been imputed. Data users should be aware that totals for adults in and not in further education are likely to be higher.

Notes:

1. Aberdeenshire Council, City of Edinburgh Council, Glasgow City Council and Stirling Council did not return any data for this item.

	In education, time not specified	2.5 days per week or fewer	3 days per week or more	Not currently in education	Not known	Total in education as % of all adults	All Adults
