

## Learning Disability Statistics Scotland, 2018 Provisional Statistics

Published: 18<sup>th</sup> December 2018

A National Statistics Publication for Scotland

### Annex B: Local Authority Level Learning Disability Statistics Scotland (2018)

This Annex provides information about adults with learning disabilities known to local authorities, at local authority level.

Any comparisons between the data provided by local authorities should take account of local populations, priorities and geographical circumstances, as well as data quality issues, for example non-response error, which have been flagged where appropriate. In particular, data users should be mindful of missing data across the individual data items.

The 2018 data collection was impacted by the introduction of the General Data Protection Regulation (GDPR) in May. This was true particularly in relation to information that is not collected routinely by local authorities through their Management Information Systems, such as employment and further education data.

Glasgow City Council was unable to return any data about adults with learning disabilities in time for the 2018 collection. To maintain national relevance, the data provided by this authority for 2017 has been included in this report. Because of this, the data presented in this publication are **provisional**. Final data for LDSS 2018 will be published when Glasgow City Council submits its data for the 2018 collection.

## Local Authority Tables:

- Table B1a-c: Adults with learning disabilities known to local authorities (2018)
- Table B2: Adults who are on the autism spectrum (AS) by local authority area (2018)
- Table B3: Adults with learning disabilities who live with a family carer by local authority area (2018)
- Table B4: Adults with learning disabilities living in the same accommodation by local authority area (2018)
- Table B5: Accommodation type for adults with learning disabilities by local authority area (2018)
- Table B6: Local Area Co-ordination (LAC) use by local authority area (2018)
- Table B7: Adults with learning disabilities who have a Personal Life Plans (PLP) by local authority area (2018)
- Table B8: Adults with learning disabilities who use an advocacy service by local authority area (individual level data) (2018)
- Table B9: Adults with learning disabilities who use an advocacy service by local authority area (aggregated data) (2018)
- Table B10: Employment opportunities for adults with learning disabilities known to local authorities (2018)
- Table B11: Category of employment opportunity for adults with learning disabilities known to local authorities (2018)
- Table B12a: Day centre attendance of adults with learning disabilities known to local authorities (2018)
- Table B12b: Alternative opportunities use by adults with learning disabilities known to local authorities (2018)
- Table B13: Further education attendance by adults with learning disabilities known to local authorities (2018)

## Disclosure Control

Disclosure control has been applied to some of the tables in this annex to prevent the release of sensitive information. Where disclosure control has been applied it has been explained in a footnote. Two methods of disclosure control have been used in the annexes:

**Suppression** of possibly disclosive cells (e.g., where the value is small) which means that the value for that cell in the table is not given as well as secondary suppression of cells which means at least one other value in the row or column is also not given to ensure that disclosive cells cannot be deduced through subtraction.

**Rounding** of cells to a multiple of a set base such as 5 where for example a true value of 3, 4, 6 or 7 would be shown as 5. This adds uncertainty to the true values of small cells.<sup>1</sup>

Please note that while disclosure control has been applied to some local authority values, national totals have remained unchanged. Therefore the sum of local authority values may not add up to national totals.

For further information on controlled rounding please contact:

## **Tables B1a-c: Adults with learning disabilities known to local authorities (2018)**

These figures include adults with learning disabilities who are known to local authorities from contact in the last year. The figures include 16 and 17 year olds who are not in full-time education. This data does not include adults with learning disabilities who are not known to local authority areas. Please see the data quality summary in Annex C, published alongside this Statistical Return on December 18<sup>th</sup> 2018 for further information.

Glasgow City Council was unable to return any data for the 2018 collection. To maintain national relevance, the data returned from this authority in 2017 has been used.

Of those local authorities who reported in 2018, City of Edinburgh Council reported the highest number of adults with learning disabilities Council (2,167 adults). Orkney Islands Council reported the lowest number of adults with learning disabilities known (87 adults).

There are 5.2 adults with learning disabilities known to local authorities per 1,000 of the population in Scotland<sup>2</sup>. At local authority level, this ranges from 3.2 adults with learning disabilities per 1,000 of the population in East Renfrewshire to 8.5 adults with learning disabilities per 1,000 of the population in East Lothian.

---

<sup>2</sup> Calculated using 2017 mid-year population estimates (General Register Office for Scotland). <https://www.nrscotland.gov.uk/statistics-and-data/statistics/statistics-by-theme/population/population-estimates/mid-year-population-estimates/mid-2017> It should be noted that the figure for the general population includes all adults aged 16-17, whereas LDSS only collects information on adults 16-17 who are not in full time education.

**Table B1a: Adults with learning disabilities known to local authorities, by local authority area (2018)**

Local authority	Total	Adults known per 1,000 population
Aberdeen City	1,046	5.4
Aberdeenshire	1,033	4.9

\*Values smaller than 5 have been disclosure controlled. This means any value under 5 is rounded to either 0 or 5 and another value in the same row has been rounded to the nearest 5 to prevent differencing (calculating a suppressed value by subtracting it from the total). Published zeroes may or may not be true zeroes.

## Notes:

1. Glasgow City Council (in 2017) and North Lanarkshire Council only returned information on adults with learning disabilities who are in receipt of a service funded by the local authority, rather than those who are known to the local authority, as this is the information which can be extracted from their Management Information Systems. Data users should be aware that the number of adults with learning disabilities in these local authorities and the total number recorded nationally are therefore likely to be an under-estimate. Of the remaining, 30 local authorities returned data as stipulated in the 2018 [Data Guidance document](#).
2. There are 1,016 adults (4.3% of **all adults**) included in the Statistical Return who are on the autism spectrum and do not have an associated learning disability.
3. The LDSS team within SCLD takes all possible steps to avoid duplicate records appearing in the Statistical Return, including data cleansing and checking processes. However, duplication of records for individuals is possible, particularly when a person is funded by one local authority but lives in and/or receives services in another. Data guidance states that the local authority which provides the majority of funding for an individual should return data on that individual. Where it is unclear which local authority provides the majority of funding, local authorities work together during data collection to minimise duplication of records. It is possible that there may be duplicate records within the statistical return, but the LDSS team estimates this will be a very small proportion of the total, given that numbers of adults with learning disabilities living in a local authority different to that which funds a service for them are low.
4. Age (as at 31/3/2018) is calculated from date of birth.
5. There are 15 adults whose date of birth has not been recorded. They have been included in the totals column for the number of adults known to local authorities.
6. These figures are likely to be an underestimate of the true number of 16 and 17 year olds with learning disabilities, as they do not include 16 and 17 year olds who are in full-time education.
7. In 2018, 9 individuals were recorded as 'other specific gender', 'gender not specified' or 'gender not known'. These individuals have not been included in any tables relating to gender, to prevent disclosure of identifying information, but are included in the totals columns in all other tables.

## **Table B2: Adults who are on the autism spectrum (AS) by local authority area (2018)\***

These figures include adults with learning disabilities who are known to local authorities from contact in the last year. The figures include 16 and 17 year olds who are not in full-time education. This data does not include adults with learning disabilities who are not known to local authority areas.

Some adults are recorded as having learning disabilities and as being on the autism spectrum, whereas a small number are recorded as being on the autism spectrum but with no associated learning disability. It is likely that this data represents a significant underestimate of the number of adults who are on the autism spectrum but have no associated learning disability. This is partly due to the fact that the data is collected directly from local authority learning disability services, with which adults on the autism spectrum may not have had direct contact, because they may not be receiving formal support or this may be available from other sources, such as the NHS. However, these figures do provide further information about adults on the autism spectrum who are known to local authority learning disability services.

Glasgow City Council was unable to return any data for the 2018 collection. To maintain national relevance, the data returned from this authority in 2017 has been used. Midlothian Council did not return data on adults with an autism spectrum diagnosis in 2018.

Information on this data item was not recorded for 3,578 adults with learning disabilities (15.3% of **all adults**). Missing data has not been imputed. Data users should be aware that the number of adults on the autism spectrum and those who do not have a diagnosis, are therefore likely to be significantly higher than reported.

4,382 adults known to local authorities in Scotland are recorded as being on the autism spectrum. This is 18.7% of **all adults** known to local authorities in Scotland.

City of Edinburgh Council reported the highest number of adults with an autism spectrum diagnosis (435 adults). This is 20.1% of all adults known to them. East Dunbartonshire Council reported the largest

proportion of adults with an autism diagnosis as a proportion of all adults with learning disabilities known to them (38.5%).

Local authority	Autism Spectrum diagnosis				No AS Diagnosis	Not known	AS diagnosis as % of all adults	All adults
	Classical Autism	Asperger's Syndrome	Other AS diagnosis	Total with AS diagnosis				
Aberdeen City	144	45	5	190	854	2	18.2	1,046

\*Values smaller than 5 have been disclosure controlled. This means any value under 5 is rounded to either 0 or 5 and another value in the same row has been rounded to the nearest 5 to prevent differencing (calculating a suppressed value by subtracting it from the total). Published zeroes may or may not be true zeroes.

Notes:

1. In 2018, 30 local authorities returned data as stipulated in the 2018 Data Guidance document.
2. Clackmannanshire, East Renfrewshire, Highland and North Lanarkshire Councils recorded all adults with an autism spectrum diagnosis known in the area as having an 'other autism spectrum diagnosis' which may reflect a processing, measurement or coding error or may relate to the way in which the local Management Information System captures the data.

### **Table B3: Adults with learning disabilities who live with a family carer by local authority area (2018)\***

These figures include adults with learning disabilities who are known to local authorities from contact in the last year. The figures include 16 and 17 year olds who are not in full-time education. This data does not include adults with learning disabilities who are not known to local authority areas.

Glasgow City Council was unable to return any data for the 2018 collection. To maintain national relevance, the data returned from this authority in 2017 has been used. Aberdeenshire, East Renfrewshire and North Lanarkshire councils did not provide data for this item.

In total, information on this item was not recorded for 6,476 adults (27.6 % of **all adults**) with learning disabilities across Scotland. Missing data has not been imputed. Data users should be aware that both the number of adults with learning disabilities who live with a family carer and those who do not live with a family carer is therefore likely to be higher than the figure reported.

Just under a third (30.3%) of **all adults** with learning disabilities known to local authorities were reported as living with a family carer.

Clackmannanshire Council reported the highest proportion of adults with learning disabilities living with a family carer, at 55.5% of **all adults** in the local authority area.

Local authority	Adults who live with a family carer	Adults who do not live with a family carer	Not known	Lives with family carer as % of all adults	All adults

\*Values smaller than 5 have been disclosure controlled. This means any value under 5 is rounded to either 0 or 5 and another value in the same row has been rounded to the nearest 5 to prevent differencing (calculating a suppressed value by subtracting it from the total). Published zeroes may or may not be true zeroes.

Notes:

1. In 2018, 28 local authorities returned data as stipulated in the 2018 Data Guidance document.

#### **Table B4: Adults with learning disabilities living in the same accommodation by local authority area (2018)\***

These figures include adults with learning disabilities who are known to local authorities from contact in the last year. The figures include 16 and 17 year olds who are not in full-time education. This data does not include adults with learning disabilities who are not known to local authority areas.

Glasgow City Council was unable to return any data for the 2018 collection. To maintain national relevance, the data returned from this authority in 2017 has been used. Aberdeenshire, East Renfrewshire and North Lanarkshire councils did not provide any data for this item.

Overall, there were 6,251 (26.7%) adults for whom this data was not known by local authorities. Missing data has not been imputed. Data users should be aware that both the number of adults with learning disabilities living as the only person with learning disabilities in their accommodation and the number of adults living with other people with learning disabilities in the same accommodation may be higher, both at local authority level and at national level.

In 2018, 54.5% of **all adults** with learning disabilities known to local authorities were the only person with learning disabilities in their accommodation. Further, 18.8% of **all adults** with learning disabilities known to local authorities live with **at least** one other person with learning disabilities.

Published zeroes may or may not be true zeroes.

Notes:

1. In 2018, 28 local authorities returned data as stipulated in the 2018 Data Guidance document.

### **Table B5: Accommodation type for adults with learning disabilities by local authority area (2018)\***

These figures include adults with learning disabilities who are known to local authorities from contact in the last year. The figures include 16 and 17 year olds who are not in full-time education. This data does not include adults with learning disabilities who are not known to local authority areas.

Glasgow City Council was unable to return any data for the 2018 collection. To maintain national relevance, the data returned from this authority in 2017 has been used. East Renfrewshire Council did not provide any data on this item.

No information was recorded on this data item for 2,888 (12.3%) adults with learning disabilities known to services. Missing data has not been imputed. Data users should be aware that the total number of adults living in mainstream accommodation, supported accommodation, registered adult care home and 'other' accommodation types is likely to be higher than recorded.

In 2018, 13,923 (59.4%) of **all adults** with learning disabilities known to local authorities were living in mainstream accommodation. A further 3,863 (16.5%) adults with learning disabilities known to local authorities were living in supported accommodation, and 1,774 (7.6%) in registered adult care homes.

Local Authority	Mainstream accommodation:			Supported Accommodation	Registered Adult Care Homes	Other	Not known	All Adults

Notes:

1. In 2018, 30 local authorities returned data on this item as stipulated in the 2018 Data Guidance document

## **Table B6: Local Area Co-ordination (LAC) use by local authority area (2018)**

These figures include adults with learning disabilities who are known to local authorities from contact in the last year. The figures include 16 and 17 year olds who are not in full-time education. This data does not include adults with learning disabilities who are not known to local authority areas.

Local area co-ordination services are not available to adults with learning disabilities throughout Scotland. Angus, Clackmannanshire, Dundee City, Falkirk, Moray, Na h-Eileanan an Siar, North Lanarkshire, Orkney Islands, Perth and Kinross, Renfrewshire, Shetland Islands, South Ayrshire and Stirling councils all report that they did not have a local area co-ordination services in 2018.

Glasgow City Council was unable to return any data for the 2018 collection. To maintain national relevance, the data returned from this authority in 2017 has been used. East Renfrewshire Council did not provide any data on this item. No information was recorded on this data item for 242 (1%) adults with learning disabilities known to services. Missing data has not been imputed.

There were 2,822 adults (12% of **all adults**) using local area co-ordination services in 2018. This means that 17.7% of **all adults living in local authorities where we know local area co-ordination services were available**, used them.

Local authority	Uses LAC	Does not use LAC	Uses LAC as % of all adults	All Adults

West Lothian	37	685	5.1	722
<b>Scotland</b>	<b>2,822</b>	<b>13,156</b>	<b>17.7</b>	<b>15,978</b>

Notes:

1. In 2018, 30 local authorities returned data on this item as stipulated in the 2018 Data Guidance document.
2. A hyphen (-) denotes that there is no LAC service available in the local authority area.
3. An asterisk (\*) denotes that the local authority did not submit data on this item.

### **Table B7: Adults with learning disabilities who have a Personal Life Plans (PLP) by local authority area (2018)\***

These figures include adults with learning disabilities who are known to local authorities from contact in the last year. The figures include 16 and 17 year olds who are not in full-time education. This data does not include adults with learning disabilities who are not known to local authority areas.

No information was recorded for 5,029 (21.4%) adults with learning disabilities on this data item. Missing data has not been imputed. Data users should be aware that the totals across the data item are likely to be higher as a result.

Glasgow City Council was unable to return any data for the 2018 collection. To maintain national relevance, the data returned from this authority in 2017 has been used. Clackmannanshire Council did not provide any data on this item.

Just under two-thirds (64.7%) of **all adults** with learning disabilities known to local authorities have a personal life plan. In 2018, 13% of **all adults** are reported not to have a personal life plan. There are 0.9% of **all adults** with learning disabilities for whom a personal life plan is not applicable. Renfrewshire and East Renfrewshire Councils both reported that all adults known to them had a personal life plan.

Local authority	Has a PLP	Does not have a PLP	Not Applicable	Not known	Has PLP as % for all adults	All adults

\*Values smaller than 5 have been disclosure controlled. This means any value under 5 is rounded to either 0 or 5 and another value in the same row has been rounded to the nearest 5 to prevent differencing (calculating a suppressed value by subtracting it from the total). Published zeroes may or may not be true zeroes.

Notes:

1. In 2018, 30 local authorities returned data on this item as stipulated in the 2018 Data Guidance document.

**Table B8: Adults with learning disabilities who use an advocacy service by local authority area (individual level data) (2018)\***

These figures include adults with learning disabilities who are known to local authorities from contact in the last year. The figures include 16 and 17 year olds who are not in full-time education. This data does not include adults with learning disabilities who are not known to local authority areas.

Data users should be aware of the limitations of this data. Individual level data on advocacy have large amounts of missing data for a variety of reasons. First, it may not be appropriate or desirable for advocacy organisations to share data about individuals with learning disabilities with local authorities, especially if the individual requires some support with an issue relating to the local authority. Second, there may be difficulties with matching data provided by advocacy organisations. Third, local authorities and advocacy organisations may not have data sharing agreements in place. Fourth, a given adult's advocacy requirements or status may not be routinely collected by local authorities. Missing data has not been imputed.

Glasgow City Council was unable to return any data for the 2018 collection. To maintain national relevance, the data returned from this authority in 2017 has been used. Individual information on advocacy status was not recorded for 14,801 (63.1%) adults with learning disabilities known to local authorities.

Local Authority	No advocate, advocate not required	No advocate, advocate required	Professional Advocate	Citizen/ independent Advocate	Self Advocacy	Group/ Collective Advocacy	Not known	Total adults with advocate	Adults who use an advocate as % of all adults

\*Values smaller than 5 have been disclosure controlled. This means any value under 5 is rounded to either 0 or 5 and another value in the same row has been rounded to the nearest 5 to prevent differencing (calculating a suppressed value by subtracting it from the total). Published zeroes may or may not be true zeroes.

Notes:

1. City of Edinburgh, Clackmannanshire, East Renfrewshire, Midlothian, North Lanarkshire, Orkney Islands and Shetland Islands councils did not return any data for this item, either aggregate or individual.
2. Falkirk Council provided both individual and aggregate level data for this item.
3. These data were collected on an individual level basis. This means a record was returned for each individual detailed in the statistics release.
4. 'Professional advocate', 'professional advocate: long term support' and 'professional advocate: short term support' are all grouped under the column 'professional advocate'.
5. \* denotes local authority returned aggregated data only (see table B9).

**Table B9: Adults with learning disabilities who use an advocacy service by local authority area (aggregated data) (2018)**

These figures include adults with learning disabilities who are known to local authorities from contact in the last year. The figures include 16 and 17 year olds who are not in full-time education. This data does not include adults with learning disabilities who are not known to local authority areas.

The data in Table B9 illustrate the aggregate number of adults with learning disabilities known to have advocacy support overall. Information is provided in this way as it may not be appropriate, desirable or possible for local authorities to provide individual level data for this item.

In 2018, 8 of 32 local authority areas were able to supply aggregate data on advocacy. Data users should be aware that adults with learning disabilities in the other 24 local authority areas may also be in receipt of advocacy services.

Local Authority	Total adults	Estimate of adults as % of all adults
Aberdeen City	113	10.8
Aberdeenshire	76	7.4
Angus		0.0
Argyll & Bute		0.0
City of Edinburgh		0.0
Clackmannanshire		0.0
Dumfries and Galloway		0.0
Dundee City		0.0
East Ayrshire		0.0
East Dunbartonshire		0.0
East Lothian		0.0
East Renfrewshire		0.0
Falkirk	42	6.2
Fife		0.0
Glasgow City		0.0
Highland		0.0

Orkney Islands		0.0
Perth and Kinross		0.0
Renfrewshire		0.0
Scottish Borders		0.0
Shetland Islands		0.0
South Ayrshire		0.0
South Lanarkshire		0.0
Stirling		0.0
West Dunbartonshire	159	34.6
West Lothian	123	17.0
<b>Scotland</b>	<b>746</b>	<b>3.2</b>

Notes:

1. City of Edinburgh, Clackmannanshire, East Renfrewshire, Midlothian, North Lanarkshire, Orkney Islands and Shetland Islands councils did not return any data for this item, either aggregate or individual.
2. Falkirk Council provided both individual and aggregate level data for this item.

3. This information was returned by local authorities as aggregated data. This is because these local authorities could not provide data for each individual person detailed in the statistics release but could state how many people with a learning disability have advocacy support overall. There is potential for duplication of records in the aggregate data on advocacy, as one individual may seek support from more than one organisation and thus be counted multiple times.
4. Figures in **bold black text** denote local authorities who returned aggregated data and no individual level data. Local authorities who returned both individual level and aggregated data have been recorded with grey text.

### **Table B10: Employment opportunities for adults with learning disabilities known to local authorities (2018)\***

These figures include adults with learning disabilities who are known to local authorities from contact in the last year. The figures include 16 and 17 year olds who are not in full-time education. This data does not include adults with learning disabilities who are not known to local authority areas.

Employment status is not recorded for 11,343 (48.4%) adults with learning disabilities known to services. Missing data has not been imputed. Data users should be aware that that the total numbers of adults with learning disabilities known to local authorities in employment and for adults not in employment are likely to be higher.

Glasgow City Council was unable to return any data for the 2018 collection. To maintain national relevance, the data returned from this authority in 2017 has been used. Aberdeenshire, Clackmannanshire, City of Edinburgh, East Lothian, East Renfrewshire and Midlothian councils did not provide any data on this item.

There were 993 adults (4.2% of **all adults**) with learning disabilities known to local authorities who were in employment. There were 11,110 (47.4%) adults with learning disabilities known local authorities who were not in employment. Shetland Islands Council reported the highest proportion of adults known to them in employment, at 30.9%.

\*Values smaller than 5 have been disclosure controlled. This means any value under 5 is rounded to either 0 or 5 and another value in the same row has been rounded to the nearest 5 to prevent differencing (calculating a suppressed value by subtracting it from the total). Published zeroes may or may not be true zeroes.

#### Notes:

1. In 2018, 25 local authorities returned data for this item as stipulated in the 2018 Data Guidance document.
2. Employment opportunities include the following: person in employment where open/non-open has not been specified; open employment; non-open employment; and self-employment.

### **Table B11: Category of employment opportunity for adults with learning disabilities known to local authorities (2018)\***

These figures include adults with learning disabilities who are known to local authorities from contact in the last year. The figures include 16 and 17 year olds who are not in full-time education. This data does not include adults with learning disabilities who are not known to local authority areas.

Employment opportunity categories include employment where open/non-open has not been specified; open employment; non-open employment; and self-employment. For an explanation of open/non-open employment, please refer to the 2018 Guidance Notes.<sup>3</sup>

Glasgow City Council was unable to return any data for the 2018 collection. To maintain national relevance, the data returned from this authority in 2017 has been used. Aberdeenshire, Clackmannanshire, City of Edinburgh, East Lothian, East Renfrewshire and Midlothian councils did not provide any data on this item.

Of the 993 adults known to be in employment, employment category is not recorded for 253 (25.5%) adults. Missing data has not been imputed.

Only one local authority recorded more than 100 people with learning disabilities in employment, therefore, the number of adults in different categories of employment are relatively small at local authority level. Data users should exercise caution when using this data to draw conclusions at local authority level.

Notes:

1. In 2018, 25 local authorities returned data for this item as stipulated in the 2018 Data Guidance document.

## **Table B12a: Day centre attendance of adults with learning disabilities known to local authorities (2018)\***

These figures include adults with learning disabilities who are known to local authorities from contact in the last year. The figures include 16 and 17 year olds who are not in full-time education. This data does not include adults with learning disabilities who are not known to local authority areas.

Glasgow City Council was unable to return any data for the 2018 collection. To maintain national relevance, the data returned from this authority in 2017 has been used. Clackmannanshire, East Renfrewshire and North Lanarkshire Council did not report data for this item.

Day centre attendance is not recorded for 6,161 (26.3%) adults with learning disabilities known to local authorities. Missing data has not been imputed. Data users should be aware that totals both for adults attending and adults not attending a day centre are likely to be higher than reported.

In 2018, 4,050 (17.3%) of **all adults** with learning disabilities known to local authorities attended a day centre and 13,235 (56.4%) did not attend a day centre.

Local authority	Attends a day centre less than 30 hours per week	Attends a day centre 30 hours or more per week	Attends a day centre, amount of time not known	Does not attend a day centre	Not known	Adults who attend a day centre as % of all adults	All Adults

Published zeroes may or may not be true zeroes.

Notes:

1. In 2018, 28 local authorities returned data for this item as stipulated in the 2018 Data Guidance document.

## **Table B12b: Alternative opportunities use by adults with learning disabilities known to local authorities (2018)\***

These figures include adults with learning disabilities who are known to local authorities from contact in the last year. The figures include 16 and 17 year olds who are not in full-time education. This data does not include adults with learning disabilities who are not known to local authority areas.

Glasgow City Council was unable to return any data for the 2018 collection. To maintain national relevance, the data returned from this authority in 2017 has been used. Aberdeenshire, Clackmannanshire, Dumfries and Galloway, East Renfrewshire and North Ayrshire councils did not provide any data for this item.

Alternative opportunities use is not recorded for 7,869 (33.6%) adults with learning disabilities known to local authorities. Missing data has not been imputed. Data users should be aware that totals both for adults using and adults not using alternative opportunities are likely to be higher than reported.

In 2018, 6,923 (29.5%) of **all adults** with learning disabilities known to local authorities used alternative opportunities and 8,654 (36.9%) did not use alternative opportunities.

Local authority	Has alternative opportunities	Does not have alternative opportunities	Not known	Adults who have alternative opportunities as a % of all adults	All adults

#### Notes:

1. In 2018, 26 local authorities provided data on this item as stipulated in the 2018 Data Guidance document.

### **Table B13: Further education attendance of adults with learning disabilities known to local authorities (2018)\***

These figures include adults with learning disabilities who are known to local authorities from contact in the last year. The figures include 16 and 17 year olds who are not in full-time education. This data does not include adults with learning disabilities who are not known to local authority areas.

Glasgow City Council was unable to return any data for the 2018 collection. To maintain national relevance, the data returned from this authority in 2017 has been used. However, Glasgow City Council was unable to return any data for this item in 2017. Aberdeenshire, City of Edinburgh, Clackmannanshire, Dumfries and Galloway, East Renfrewshire, Inverclyde, Midlothian, Moray, South Ayrshire and West Dunbartonshire did not provide information for this data item.

The further education status of 12,834 (54.7%) adults with learning disabilities is not recorded. Missing data have not been imputed. Data users should be aware that totals for adults in and not in further education are likely to be higher.

In 2018, 1,029 (4.4%) of **all adults** with learning disabilities known to local authorities were in further education and 9,583 (40.9%) were not in further education.

	In education, time not specified	2.5 days per week or fewer	3 days per week or more	Not currently in education	Not known	Total in education as % of all adults	All Adults
